PROFILE

Second-year Data Science & Engineering student at MIT Manipal with 4 production-deployed financial software systems – spanning LLM-powered fraud audit, quantitative risk modeling, and full-stack SaaS analytics. Seeking internship roles in ML engineering, quantitative analytics, or financial technology where statistical modeling meets scalable infrastructure.

EDUCATION

Manipal Institute of Technology, MAHE

B.Tech in Data Science & Engineering

Relevant Coursework: Data Structures & Algorithms, Statistical Modeling, Linear Algebra & Probability, Database Management Systems

Udupi, India

Aug 2024 – Present

EXPERIENCE

Technology & Operations Lead (Student Volunteer) – *AIESEC, Manipal Institute of Technology* **Feb 2025 – Present**
Udupi, India

- B2B pipeline tracked manually across disconnected spreadsheets with 2-day reporting lag – engineered Python + Google Sheets API automation consolidating **100% of pipeline data** into real-time dashboards, cutting reporting overhead by **40%** and enabling same-day decision-making
- Chapter conversion rate stalled below 20% – restructured outreach targeting and pitch sequencing across **50+ enterprise accounts**, lifting conversion to **35%** and generating **\$1,600+** in chapter revenue
- Identified **3 critical workflow handoff failures** causing deal-close delays – redesigned pipeline logic, reducing operational cycle time by **30%** and increasing throughput by **30%** while coordinating a team of 7

ENGINEERING PROJECTS

FraudGuard AI – *Python, FastAPI, XGBoost, SHAP, Llama 3.3 70B, Next.js, Vercel*

[\[Code\]](#) [\[Live\]](#)

- Fraud analysts spend 40+ mins writing compliance reports per flagged transaction – deployed Llama 3.3 70B via Groq API to auto-generate **Basel III compliant audit narratives** directly from SHAP explainability outputs, reducing narrative generation to **under 3 seconds**
- Underlying XGBoost pipeline processes **284,807 transactions** against **0.17% fraud prevalence baseline**; hybrid SMOTE resampling elevated fraud recall to **70%+**, achieving **99.85% accuracy** and **0.968 AUC-ROC** – modeled **\$2M+** fraud prevention impact at production volumes
- Shipped FastAPI backend with Next.js frontend on Render/Vercel; models hosted on **Hugging Face Hub** with runtime download – zero model files in version control; one-click **PDF compliance report** export with animated SHAP risk dashboard

Quantitative Portfolio Risk Platform – *Python, FastAPI, Next.js, NumPy, SciPy, Pandas*

[\[Code\]](#) [\[Live\]](#)

- Retail portfolio tools lack institutional risk metrics – engineered platform executing **8 quantitative models** on live market data including Monte Carlo simulation (**200 scenarios, 252-day horizon**) and Markowitz mean-variance optimization
- Delivered risk reporting suite computing **VaR (95%/99%), CVaR/Expected Shortfall, maximum drawdown, and portfolio beta** – metric set consistent with Basel III standards used in trading and asset management
- FastAPI backend with cloud-deployed Next.js frontend achieves **sub-2s response** across **6 macro stress scenarios** (2008 GFC, COVID-19, Dot-com crash, 2013 Taper Tantrum, 2020 Oil Crash, 2022 Rate Hike)

FinFlow – Full-Stack Financial Analytics Platform – *Next.js, FastAPI, PostgreSQL, JWT*

[\[Code\]](#) [\[Live\]](#)

- Designed and shipped full-SDLC SaaS finance dashboard from architecture through CI/CD deployment – JWT/bcrypt application security, **4 transactional CRUD modules**, real-time revenue visualization, serverless PostgreSQL on Neon/Vercel with **zero cold-start latency**

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL, TypeScript, JavaScript (ES6+), R

CS Foundations: Data Structures & Algorithms, SDLC, Agile, CI/CD, Application Security, Scalable Systems Design

ML & Data: Machine Learning, LLM Integration, RAG, XGBoost, SHAP, SMOTE, Pandas, NumPy, Scikit-Learn

Quant / FinEng: Financial Modeling, Risk Analytics (VaR/CVaR), Portfolio Optimization, Monte Carlo, Fraud Detection

Cloud & Tools: Vercel, Render, Hugging Face Hub, Groq API, FastAPI, Next.js, PostgreSQL, REST APIs, Docker, Git

CERTIFICATIONS & ACHIEVEMENTS

Certifications: Google Data Analytics Professional, IBM Python for Data Science, Meta Data Analytics, McKinsey Forward Program

Competitions: **Case-a-thon 2026** – Advanced to Round 2 of 3 across **438 registered participants** (MIT Manipal, Strategy & Business Analysis)

Recognition: **GSSoC 2026** – Selected Contributor, AI/Agents Track (**30,000+ participants**)
